WILDTRACK · CAPR-F2026 · TESTING PHASE

Functional Test Report TC-01 – TC-55

Task #2 · Paudel Amrit (Test lead / QA) · 28 October 2026

Result: all 55 functional test cases passed on 27 October 2026, and no bugs were found. Every functional requirement covered by these tests (FR-01 – FR-13) behaves as the test plan expects.

1. Tester and task

Name	Paudel Amrit
Student ID	2530048
Role	Test lead (QA)
Team members	Gupta Aman Kumar (2530001), Singh Shubham Kumar (2530028), Paudel Amrit (2530048)
Project	WildTrack – Species Distribution Tracker for South Korea (CAPR-F2026-WildlifeTracker)
Task	GitHub issue #2 – Run the functional tests TC-01 – TC-55
Test plan	`testing/TEST_PLAN.md`, sections 4.1 – 4.7

2. Summary

TEST CASES RUN	PASSED	FAILED	BLOCKED
55	55	0	0

3. Test environment

Date of testing	27 October 2026
Site tested	Local copy: `http://localhost/CAPR-F2026-WildlifeTracker/public/`
Server	XAMPP (Apache + PHP 8) on Windows
Browser	Google Chrome (latest), desktop
Starting state	Map page, Busan, 10 km, 75 records, all six animal groups
Not tested	The external services themselves (GBIF, Nominatim, Photon, Wikipedia), only how WildTrack uses them

4. Method

Each test case was run one at a time in the order of the test plan, following its steps exactly. The result was compared with the "Expected result" column. A case was marked **Pass** only when every expected point

was observed. Settings changed for a test (date filters, unticked groups, max records, blocked location, the GBIF address in `config.php`) were reset afterwards, so they did not affect the next case.

5. Results by area

Area	Requirements	Test cases	Run	Passed	Failed
Place search, Quick Locations, Locate Me	FR-01, FR-11	TC-01 – TC-10	10	10	0
Map, base maps, legend	FR-02, FR-08	TC-11 – TC-14	4	4	0
Sightings, table, filters	FR-03 – FR-06	TC-15 – TC-26	12	12	0
Species Profile and GBIF link	FR-07, FR-09	TC-27 – TC-31	5	5	0
Messages and loading	FR-10	TC-32 – TC-36	5	5	0
Find an Animal	FR-13	TC-37 – TC-43	7	7	0
Animal Encyclopedia	FR-12	TC-44 – TC-55	12	12	0
Total			**55**	**55**	**0**

6. Detailed results

All cases were tested by Paudel Amrit on 2026-10-27 in Chrome on localhost. Notes show the input used or any special setting.

ID	Test	Result	Notes
TC-01	Search a city	Pass	Ulsan, Enter
TC-02	Search button	Pass	Gyeongju, magnifier
TC-03	Empty search	Pass	
TC-04	Place outside Korea	Pass	Vancouver
TC-05	Place suggestions	Pass	“Jiri” → Jirisan National Park
TC-06	Pick a place suggestion	Pass	Arrow keys + Enter
TC-07	Close the suggestions	Pass	Esc
TC-08	Quick Location	Pass	Jeju Island
TC-09	Locate Me (allowed)	Pass	
TC-10	Locate Me (refused)	Pass	Location blocked in site settings
TC-11	Pan and zoom	Pass	
TC-12	Base maps	Pass	Satellite, Topographic, Street
TC-13	Recenter	Pass	
TC-14	Legend	Pass	
TC-15	Default search	Pass	Busan, 10 km
TC-16	Table paging	Pass	
TC-17	Change radius	Pass	25 km

ID	Test	Result	Notes
TC-18	Apply filters	Pass	
TC-19	One group	Pass	Birds only
TC-20	Fish filter	Pass	Ulsan, Fish only
TC-21	No group	Pass	
TC-22	Date range	Pass	2025
TC-23	Only a To date	Pass	To = 2020-12-31
TC-24	Wrong date order	Pass	
TC-25	Max records	Pass	Busan, 25 km, 150
TC-26	Max records visible	Pass	Short window
TC-27	Select a pin	Pass	
TC-28	View button	Pass	
TC-29	Fish group	Pass	Badge “Fish”, Class Actinopterygii
TC-30	GBIF link	Pass	Opens in new tab
TC-31	Close profile	Pass	X and Esc
TC-32	Message position	Pass	Top centre, about 5 s
TC-33	No repeated messages	Pass	
TC-34	Loading message	Pass	Seoul, 100 km, 300; “GBIF is slow” shown
TC-35	Quick changes	Pass	Final result 5 km
TC-36	GBIF unreachable	Pass	base_url changed, then restored
TC-37	Suggestions	Pass	“mag”
TC-38	Pick a suggestion	Pass	Oriental Magpie
TC-39	Common name	Pass	water deer
TC-40	Scientific name	Pass	Pica pica
TC-41	Not recorded nearby	Pass	tiger
TC-42	Unknown name	Pass	xyzzy
TC-43	Show all animals	Pass	
TC-44	Open page	Pass	
TC-45	Every group	Pass	All 12 groups
TC-46	Fish list	Pass	
TC-47	Detail card	Pass	
TC-48	Close dialog	Pass	X, Esc and click outside
TC-49	Wikipedia / GBIF links	Pass	Both open in new tabs
TC-50	See on the map	Pass	

ID	Test	Result	Notes
TC-51	Search all animals	Pass	“dragonf” → Butterfly Dragonfly
TC-52	Search all: other name	Pass	tiger
TC-53	Search in a group	Pass	Insects, “bee”
TC-54	Wrong group	Pass	Insects, “magpie”
TC-55	Map → Encyclopedia	Pass	

7. Observations

No functional bugs were found, so no bug-report issues were opened. There were two setup observations and one performance note:

- **Config file names (setup).** In the local copy the settings files were named `config.php.php` and `config.example.php.php`, so the app could not find its settings and searches did not work. Renaming them to `config.php` and `config.example.php` fixed it. The files on GitHub are named correctly. Windows hides file extensions by default, which makes a doubled `.php` easy to miss. *Suggestion:* add "turn on View → File name extensions before renaming" to the setup steps in issue #1.
- **File encoding (setup).** The local `TEST_PLAN.md` was saved as UTF-16 instead of UTF-8. The results were therefore entered into the latest UTF-8 version from GitHub, so the commit stays readable as text.
- **GBIF speed (performance).** A large search (Seoul, 100 km, 300 records) took longer than 5 seconds. The message "GBIF is slow right now — still loading..." appeared as designed. This is measured further in the speed test (issue #3, TC-56).

8. Version control evidence

Commit	`b494776` – "Add functional test results TC-01 to TC-55 (closes #2)"
Merge commit	`2b4ae7b` – merged with the team's latest changes, no conflicts left
Author	Amrit-077 (own GitHub account)
Date	27 October 2026
Changed file	`testing/TEST_PLAN.md` – 55 rows filled (Result, Tester, Date, Notes)
Repository	github.com/Guptaji101/CAPR-F2026-WildlifeTracker

9. Next steps

Task	Issue	Due
Lead the usability test with 3–5 classmates	#5	10 Nov 2026
Write the testing report	#6	17 Nov 2026
Individual progress PDF (whole team)	#10	26 Nov 2026
Presentation (whole team)	#11	2 Dec 2026
